Navigation

As on all official SCSU Web sites, you will find the SCSU navigation bar at the top of each page and the footer at the bottom. Along the left side is the main navigation for HuskyNet. When you click on a category in the left navigation, pages inside that category will appear as links underneath. For example, click on the Software category and see the links that appear.

When you are browsing within a category, you will often see additional resources on the right side of the page directly related to that category, including contacts, additional links, and when applicable, “IN THIS SITE,” a secondary navigation for that category (see example to the right). Category pages also contain any pertinent updates to the related information and in the case of large areas such as the ResNet site, a separate set of navigation links may be available.

Where can I find information?

You can find many of the most commonly used links right on the HuskyNet home page. The buttons on the right side of the home page will quickly get you to E-mail, Desire2Learn (D2L), File/Web Space, Activate My HuskyNetID and Reset My Password. If you are looking for more detailed information rather than quick links, you can locate these topics under My HuskyNet in the main navigation on the left.

Along the bottom of the HuskyNet home page, you will also find direct links to the HelpDesk and Computer Store.

General Tips

- Click the HuskyNet banner at the top of every page to return to the HuskyNet home page.
- Click Reset My Password on the right side of the HuskyNet home page if you would like to change the password associated with your HuskyNetID, or if you have forgotten it and would like a new password.
- View the number of computer stations available in the General Access labs on campus by clicking on Computers & Printing.
- Look for Quick Tips within the site for additional information on a variety of topics.

Contact

Contact the HelpDesk if you have any questions about the HuskyNet Web site.
